

Training Calendar

Essentials (3 CPD points):

Basic information regarding clinical aspects of hepatitis, lived experience and case studies.

**17 May, 6:00pm; 14 June, 9:30am; 12 July, 9:30am;
16 August, 9:30am; 13 September, 9:30am**

Comprehensive: Liver Conditions

The liver, its functions; the types of hepatitis; hepatitis disease progression; and practical ways for keeping the liver healthy.

Comprehensive: Chronic Hepatitis

Chronic hepatitis B and C, the natural history of the infection, and how it is diagnosed and clinically managed.

Comprehensive: Stigma and Empathy

How stigma discourages people from being tested and treated for viral hepatitis and the professional tools necessary to counter stigma.

Comprehensive: Hepatitis C Treatment

New treatments: effectiveness, side effects, contraindications and re-infection.

Comprehensive: Hepatitis B Treatment

Treatments: effectiveness, side effects, contraindications and immunisation.

Comprehensive: Hepatitis Prevention

The strategies and practices that will assist in the prevention of hepatitis transmission.

Comprehensive: Hepatitis C Testing

Methods used to test for hepatitis C and how to encourage and support a client through the testing process.

Comprehensive: Hepatitis B Testing

Methods used to test for hepatitis B and how to encourage and support a client through the testing process.

Comprehensive: Hepatitis C Epidemiology

Epidemiology of hepatitis C: the risk factors of transmission, primary at risk communities and strategies that may contribute to the elimination of hepatitis C.

Comprehensive: Hepatitis B Epidemiology

Epidemiology of hepatitis B: the risk factors of transmission, primary at risk communities and strategies that may contribute to the elimination of hepatitis B.

Comprehensive: Hepatitis and Migrant Communities

The way in which viral hepatitis impacts on migrant communities, refugees and temporary visa holders in Australia.

Comprehensive: Hepatitis and People Who Inject Drugs

Viral hepatitis in the injecting drug community and strategies to minimise harmful behaviour.

Comprehensive: Mother, Baby and Hepatitis

How hepatitis can be transferred from mother to baby and the medical measures available to inhibit this transference.

Comprehensive: Hepatitis B and Chinese Community

Viral hepatitis in the Chinese community and strategies to encourage immunisation, testing and treatment.

Comprehensive: Infection Control

Working safely with blood and blood-borne viruses in health and community contexts.

Comprehensive: Hepatitis Treatment System

The hepatitis treatment system and the roles of the health care team.

Comprehensive: Alcoholic and Fatty Liver

The community impact of alcoholic hepatitis and fatty liver disease.

Comprehensive: Practical

Practical session: Empathy, Verbal and Non-Verbal Communication, Interpreters, Care Plans and Self-Management.
