

Liver clinics and Liver specialists

Current as of February 2016

To access public hepatitis C treatment services a referral from a GP is needed.

In most cases a referral is faxed to the hepatitis treatment service. The hepatitis treatment services will generally not discuss your treatment options with you until after they have received a referral from your GP.

This list of hepatitis treatment services includes clinics that are known to Hepatitis Victoria. Not all possible services are listed and there may be others in your local area.
